**Naics**

- > **518210** Data Processing, Hosting & Related Services
- > **541330** Engineering Services
- > **541511** Custom Computer Programming
- > **541512** Computer Systems Design
- > **541513** Computer Facilities Management
- > **541519** Other Computer Related Services
- > **541611** Admin/General Management Consulting
- > **541690** Other Scientific & Technical Consulting

**PAST PERFORMANCE**

**Cybersecurity - DHS:** Developed customized automation solution that integrated with existing security tools and workflows, enabling continuous assessment of security controls, automated compliance verification, and streamlined reporting.

**Modernization - DoD:** Delivered an executive dashboard unifying data from many systems into a single common operating picture, enabling full mission visibility, end-to-end management, and faster data driven decisions.

**Cloud - FBI:** Design, Implement, and Maintain secure cloud environments for information sharing between mission partners. Developed highly available, resilient, and secure applications hosted on AWS.

Since 2007, Graham Technologies has partnered with government agencies and private industry to deliver mission-critical solutions that work — on time and on budget. Our team of **highly cleared (TS/SCI)** technology and security experts infuses cybersecurity and innovation into everything we do, blending the best of commercial and federal solutions.

With proven past performance supporting more than 15 federal clients — including **DoD, DHS, CDC, FAA, FBI, ODNI, and DIA** — we specialize in **next-level systems, cloud modernization, DevSecOps, advanced analytics, and cybersecurity resilience**. Our track record of exceptional and excellent CPAS ratings reflects our commitment to **delivering robust, scalable, and high-performing solutions** that drive results and safeguard the mission.

**CAPABILITIES**

**CYBERSECURITY** *Fortifying Your Mission-Critical Assets*

- > Vulnerability Management
- > Continuous Monitoring
- > Risk & Vulnerability Assessments
- > Incident Response
- > Penetration Testing
- > Cyber Threat Intelligence

**DATA ANALYTICS** *From Big Data to Big Decisions*

- > Machine Learning
- > Database Development & Management
- > Artificial Intelligence
- > Data Warehouse Solutions

**MODERNIZATION** *Optimizing Systems for Speed, Scalability & Automation*

- > Agile Development (Dev/Sec/Opps)
- > Systems Design, Integration & Management
- > Robotic Process Automation (RPA)
- > COTS Integration
- > Legacy Systems Migration
- > Low-code/no-code

**CLOUD** *Flexible, Fast & Ready to Scale*

- > Architecture & Design
- > Microservices
- > Amazon Web Services
- > Cloud Migration
